

FLiP Intelli-gate Security

The Electronic Intelligent Security Guard!

FLiP® Intelli-gate Security utilizes the latest FLiP technology to *reduce your theft losses*. This electronic intelligent security guard stands at your exit door tracking every single item moving towards and through your exit that hasn't been paid for and alerting you to the theft! This electronic security guard is intelligent. It lets you know **WHAT** is walking out the door that hasn't been purchased and alert you to the theft only if the item is moving **TOWARDS** or **THROUGH** the gates. The electronic security guard works 24/7 and constantly monitors your door. The best part is that you don't have to change anything to setup this system because it works with your existing hardware and software!

LET'S YOU KNOW WHAT AND HOW AN ITEM IS WALKING OUT THE DOOR. NO MORE FALSE ALARMS!

Dimensions	2 Side Gates 68.13" x 14.5" x 2.75" Thin profile for mounting close to walls 3 inch clearance requirement for walls Decal friendly design Steel floor mounting plates with universal mounting holes
Weight	100 lbs (2 gates and RFID reader)
Alarm	24 VDC piezo buzzer This 85dB Piezo Buzzer operates on 4-28VDC, carrying 5mA current at 12V, with a loud buzzer tone rating of 3,600Hz. Maximum current: 5mA at 12V
Antennas (4 total)	Each Side Gate: 2 Circular Polarized pattern 1 gate 17 foot cable with reverse TNC connectors 9 dB gain each antenna
Interface	Ethernet RJ-45 (RS232C Optional)
Case	L752/ABS Plastic Molded texture black
Operating Temperature	-10° to +50°
Power Supply	Built in with internal AC Adapter for RFID reader Built in 24VDC, 5 amp siren and output relay supply
Operating Distance between gates	3.5 ft

Software FLiP security .dll inegrates easily you're your system and monitors everything walking out the door and alerts you of WHAT is walking out the door that hasn't been paid for.
